

# Instalação do Android Studio 3.1.3

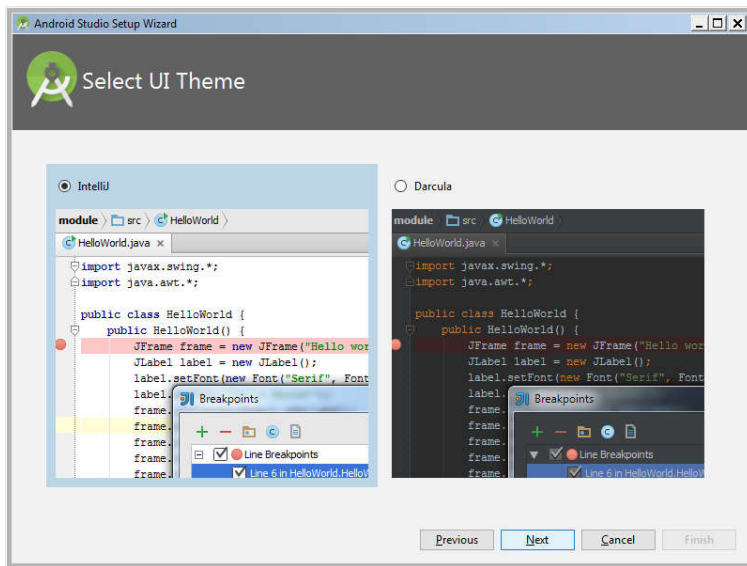

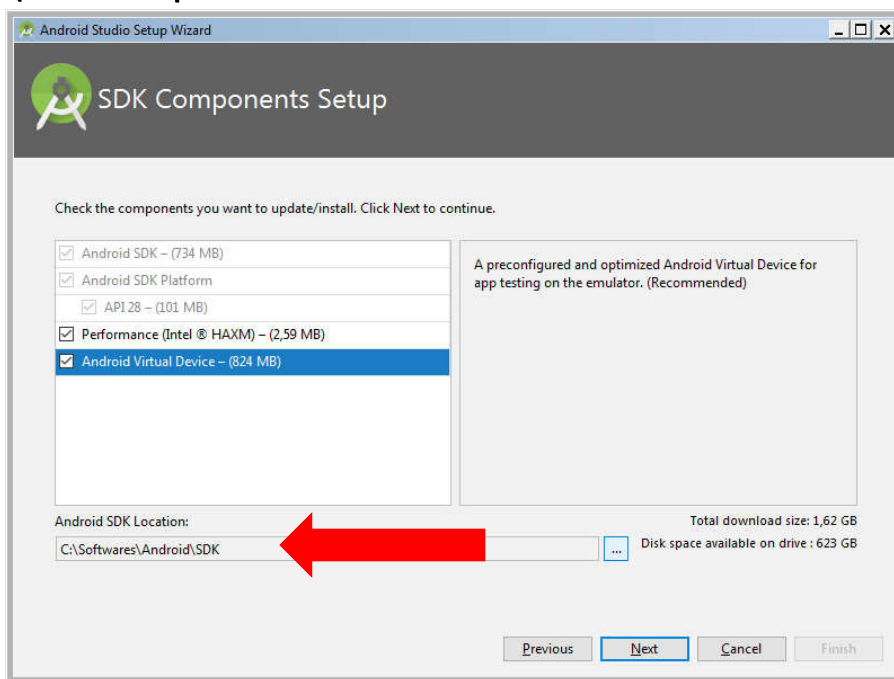

Mas **Não Acabou!!!!** Agora vem a parte mais demorada!!!!

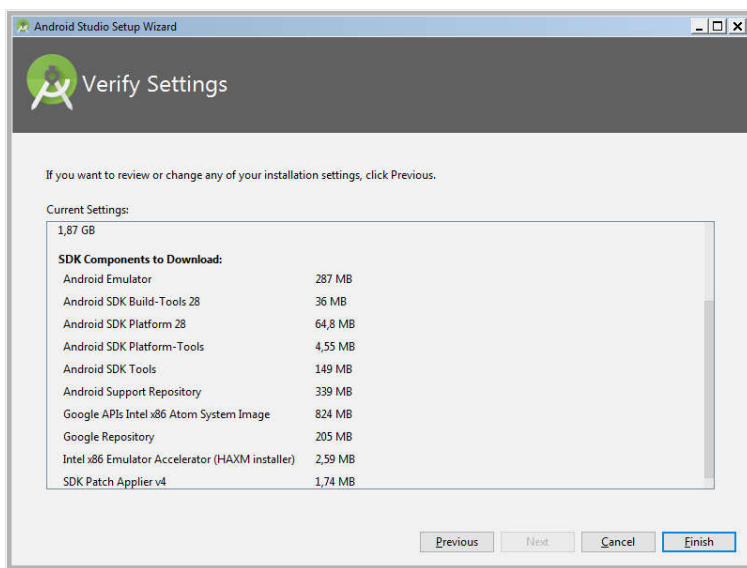

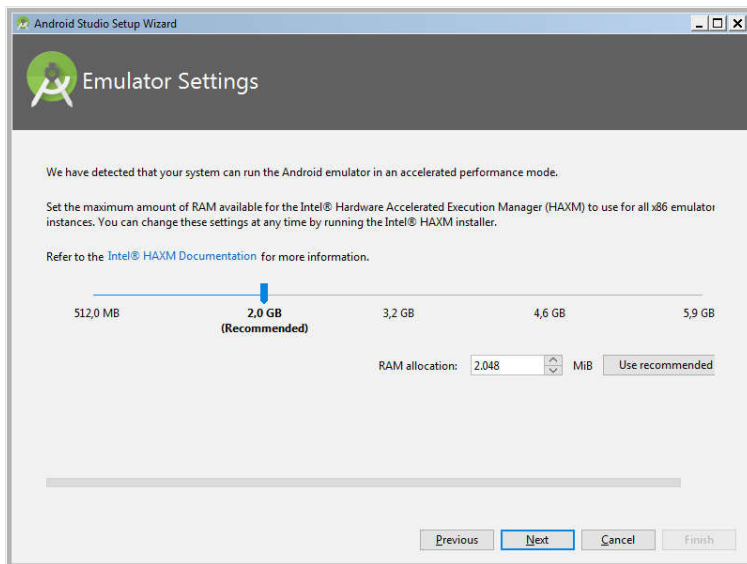

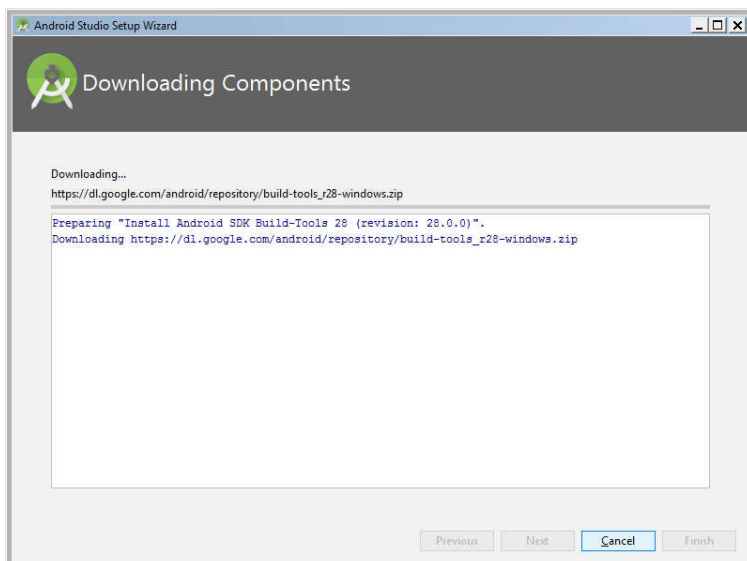

**ATENÇÃO!!!** Não Instalar no diretório padrão  
(tem que ser um diretório acessível pelo aluno)

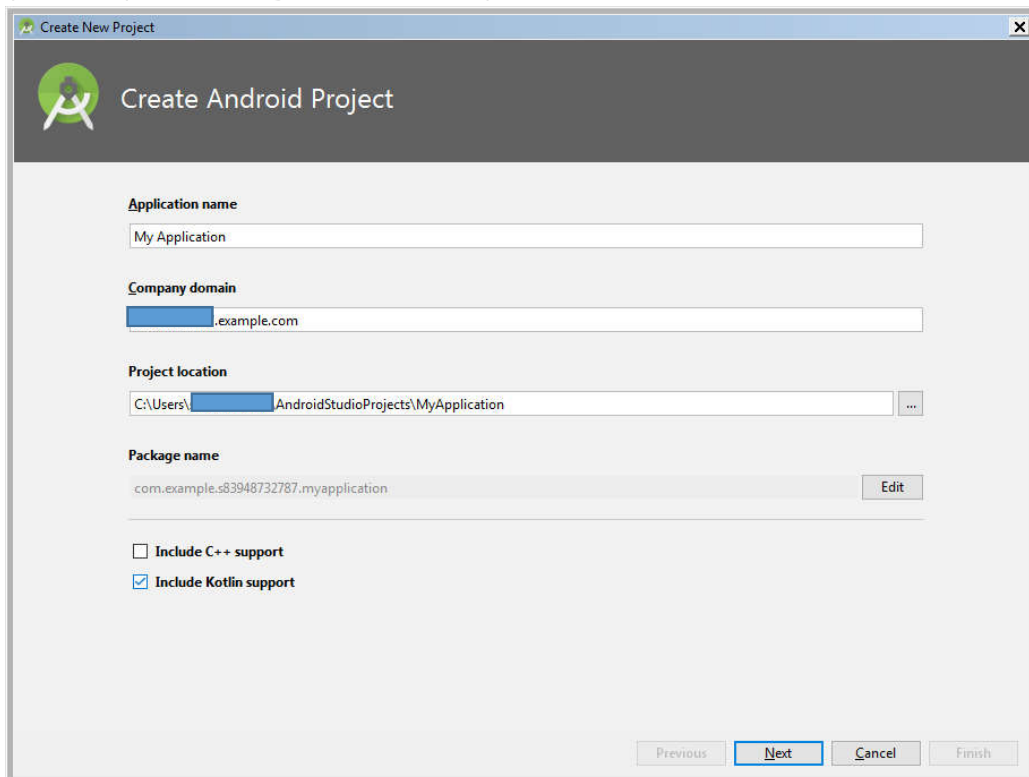

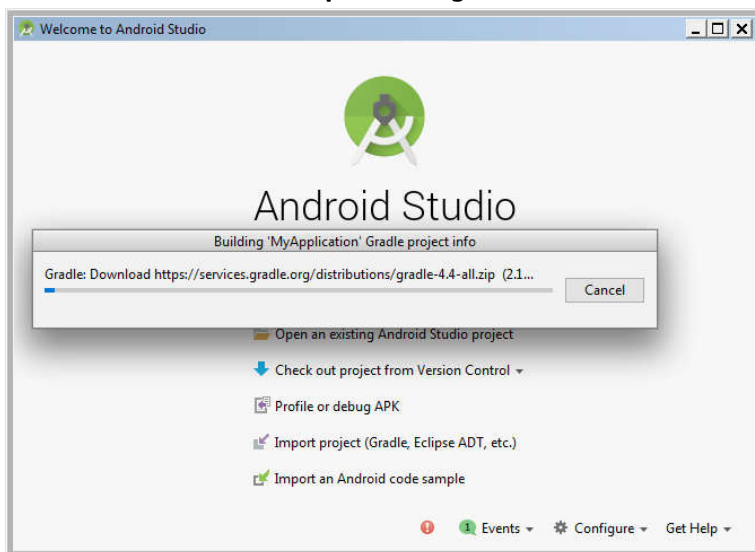

Essa etapa **DEMORA MUITO!!!!** Não tem como fazer durante a aula!!!!

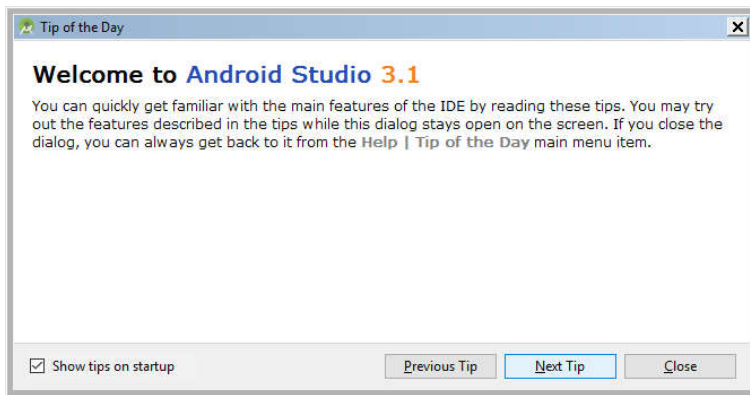

Depois tem que criar um projeto simples, porque alguns arquivos ainda vão ser baixados

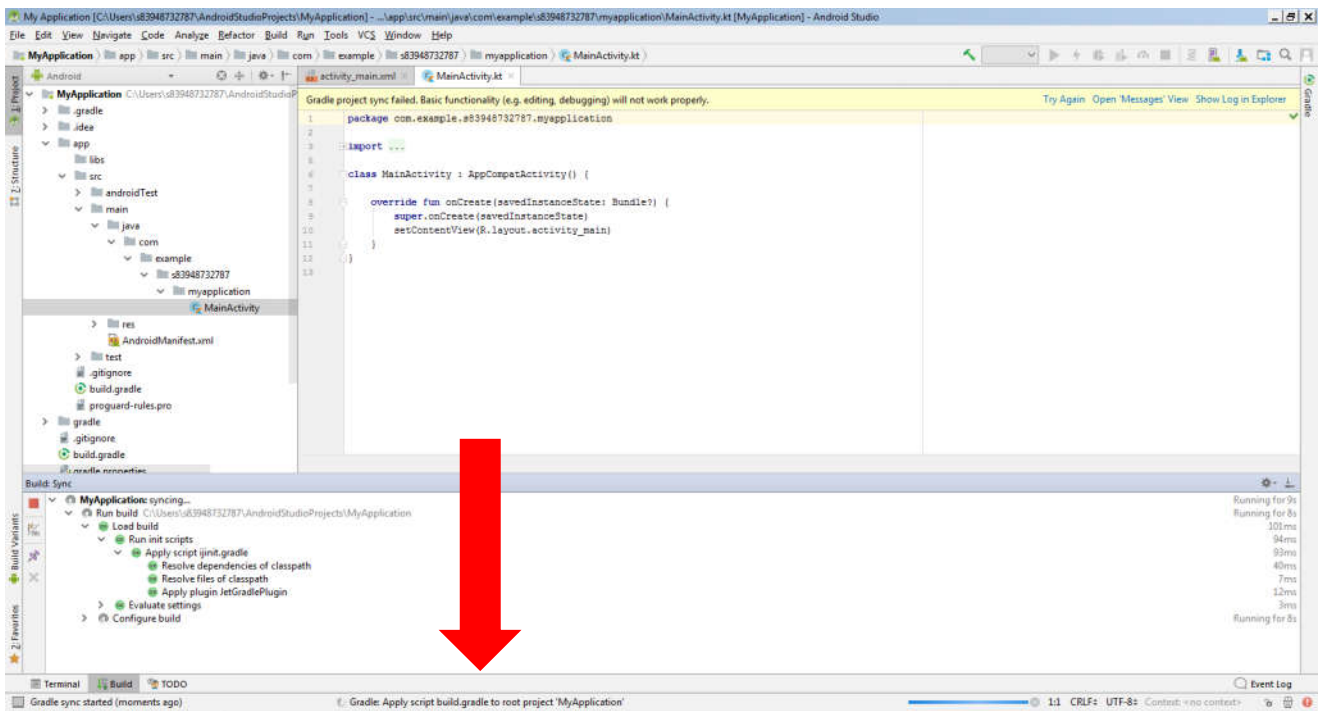

Mais uma operação DEMORADA!!!!

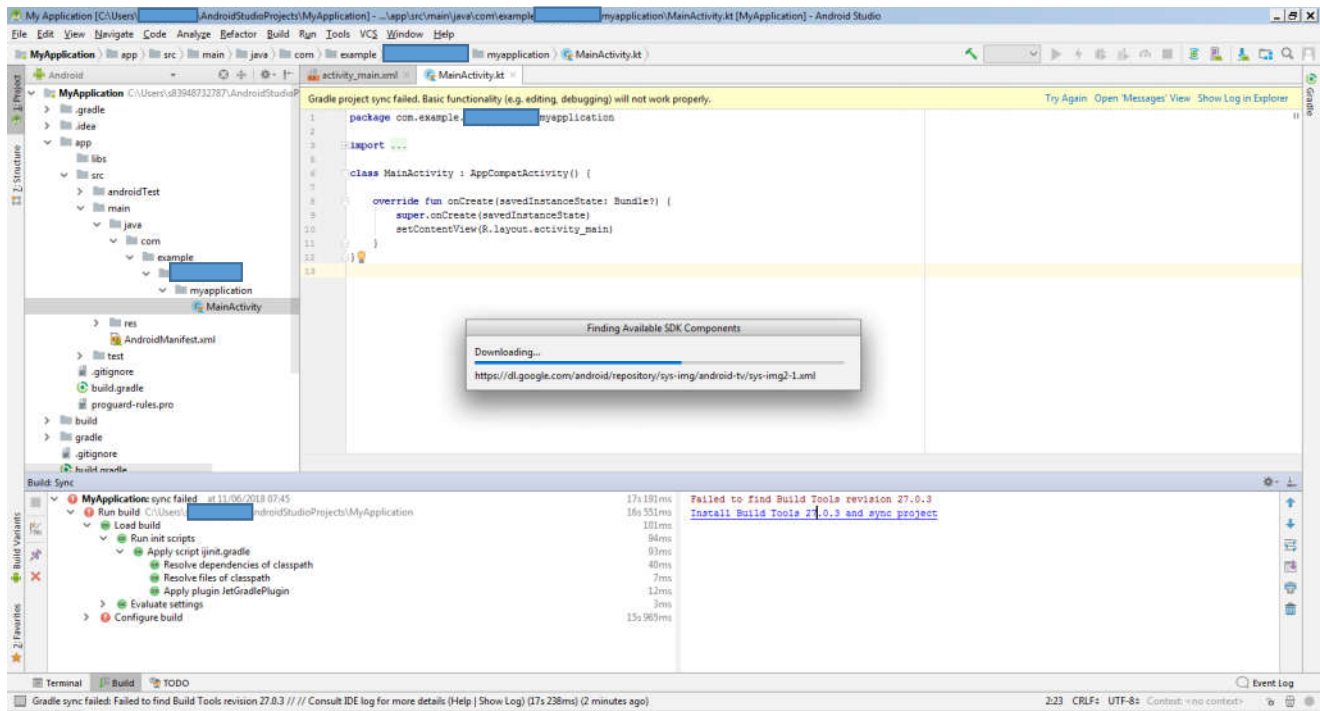

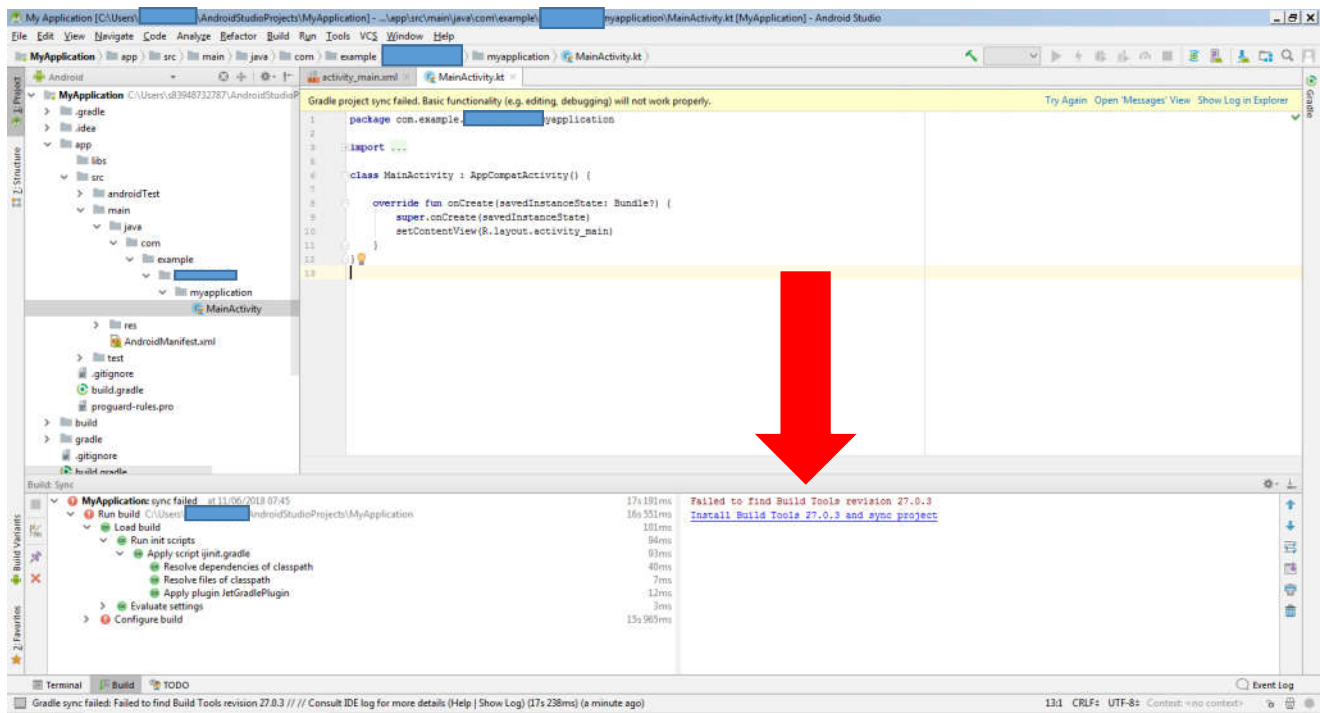

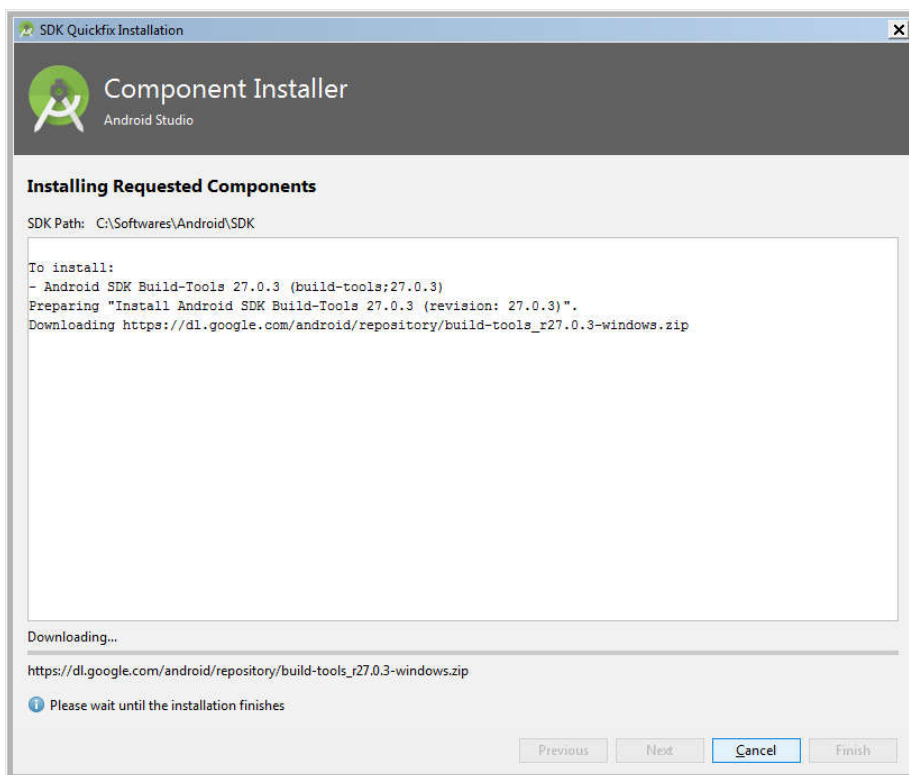

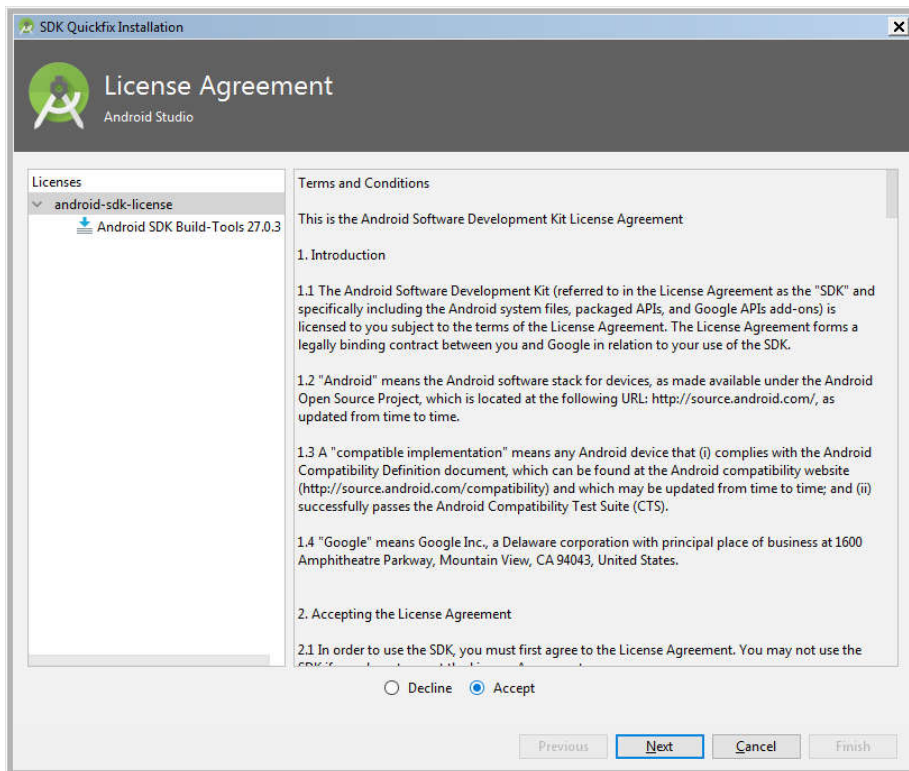

Ao abrir, ainda serão baixados itens

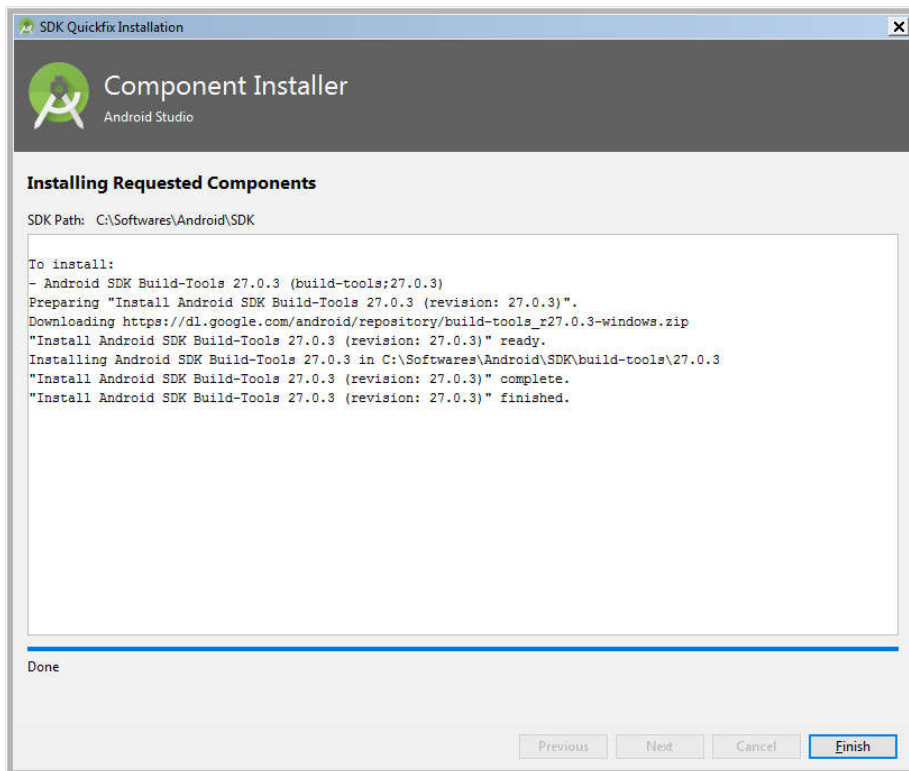

Vai dar erro na construção do projeto – clique no link para baixar mais itens

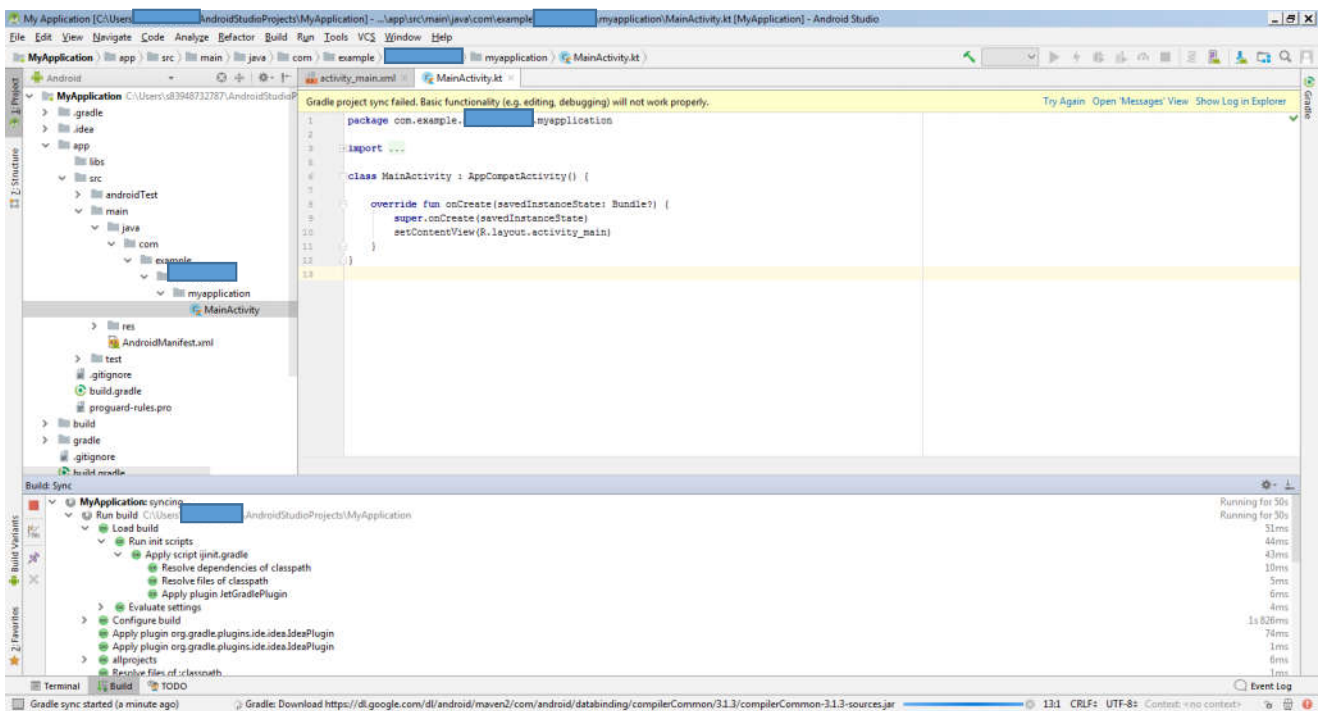

Na sincronização o Android Studio ainda vai baixar mais itens

O ideal é rodar o Hello World e ver se está tudo 100%
